“Thinking Beyond the Border”

Join us for the CN Forum at Michigan State University, Union Building, Second floor Ballroom, 3:00–5:00 p.m.

This year’s CN Forum broadens the discussion of policy-relevant issues shared by U.S. and Canada between government and business leaders, the university and research community, as well as the general public. In its third year, this forum has laid a foundation of understanding about the relationship between U.S. and Canada. Recent events have called attention to the importance of strong relationships across common borders. Our audience is better in tune with the complexity of concerns shared by those in the Great Lakes Region, as they are about the broad nationwide effect of exchanges between the two countries and the positive influence we can have on one another. Today, we can and must talk about U.S. and Canada relations like never before.

Michigan State University is pleased to announce Harold Kvisle as the 2007 CN Distinguished Guest Lecturer.

Mr. Kvisle is well experienced in addressing a diverse set of interests in the areas of policy, business, research, and advocacy. He has been President and CEO of TransCanada Pipe Lines Limited (TCPL) since May 2001, and TransCanada Corporation since May 2003. Mr. Kvisle joined TCPL in 1999 as Executive Vice-President for Trading and Business Development, with responsibility for power and pipeline ventures in North America. He was also responsible for TransCanada’s marketing and trading activities in power and natural gas.

Panelists from both the U.S. and Canada, representing the public and private sectors, will follow the keynote address with comments. Questions from the audience will be taken. Check www.cnforum.msu.edu or www.ippsr.msu.edu for forum updates.
